

austechchemicals

Austech Chemicals is a contract manufacturer providing toll blending services on a highly confidential basis to many of Australia's major retailers and industry leading companies for both flammable and non-flammable products. We have the expertise to blend product economically, safely and accurately with experience to date with mining, timber, agricultural, water treatment and industrial products. Austech blends using ingredients supplied to us by customers or we can purchase the raw materials on the customer's behalf for an agreed unit price with absolute confidentiality.

At our licensed manufacturing facility in Brisbane, Queensland we have the capability to manufacture both large volumes and smaller more customised product batches. When undertaking due diligence for contract manufacturing our customers are interested in one or more of the following factors;

- Confidentiality
- Capacity, lead times and our track record
- Cost and economy of scale for various contract sizes
- Formula development and / or improvement
- Professional design and packaging services
- Documented Quality Control systems and testing services
- Contract storage and logistical support

Austech Chemicals has strengths in all the above areas whether it is our own experienced chemists or the label and graphic design team. Most importantly we have the capacity with numerous vats of different size and our own flammable products storage and blending area. We can package in sizes from 250mL to 1000L in multiple options of shape and container type. We also have the ability to dispatch up to 50,000l in bulk shipments. Austech Chemicals has the skill and capacity needed to manufacture to the requirements of most companies looking for toll blending or contract manufacturing services.

Austech Chemicals also has both flammable and non flammable storage capability. We provide services for the loading and unloading of products in accordance with the applicable standards relating to that product. Our facility is both modern and well managed making it a very suitable solution for chemical storage needs. For large rotating stock holdings we can provide up to the minute reports from our custom inventory software.

For a more detailed understanding of our suitability for your contract blending needs please do not hesitate to contact us.
